Your Comments: The proposed plan from the EPA to clean up the Willamette River lacks a comprehensive plan to address the contaminated river. Please consider a more robust plan to remove more polluted sediment and to hold those companies responsible for polluting the river financially accountable.

By holding them accountable, it will allow more of the river to be cleaned and give a chance for the wildlife to survive. I am sure you agree with this plan as it seems to me this approach embraces the mission of the EPA. Thank you.
